environment

sustainability in practice: development and the environment

DevTech Systems Inc. (DevTech) is committed to programs relating to environment, natural resources, and agriculture that promote sustainable economic growth while maintaining and enhancing the natural resource base.

DEVTECH

NATURAL RESOURCE MANAGEMENT

DevTech collaborates with governments, the private sector, and civil society in developing countries and countries in transition to foster a sound and stable economic environment.

Institution Building and Strengthening

- Designing and delivering trainings to improve the integration of gender and environmental concerns in the Philippines
- Conducting environmental sector assessments for gender impact in Mexico

Cross-cutting Solutions

- Improving community-based natural resource management
- Integrating gender into non-governmental organization and private sector conservation strategies
- Bolstering conservation financing in Russia Far East
- Assisting governments with establishing policies to promote land tenure reform culminating in the report: "Environmental Impacts of Land Privatization in Select Countries of Eastern Europe and Eurasia: An Assessment of Priority Issues"

ENVIRONMENTAL COMPLIANCE AND KNOWLEDGE MANAGEMENT

DevTech supports international donors and their partners to achieve objectives through improved environmental and knowledge management systems.

Environmental Compliance

- Promoting cleaner production and the implementation of Environmental Management Systems
- Facilitating compliance with federal environmental regulations and procedures
- Auditing project portfolios for mitigation and monitoring of environmental impacts
- Developing and implementing environmental compliance training and workshops in Montenegro and Macedonia

Biodiversity and Forestry Assessments

- Conducting the initial biodiversity assessment for USAID/Cyprus to assist the Mission to prepare its first Mission Strategy
- Completing an update of the biodiversity analysis for Ukraine, Moldova, and Belarus
- Leading biodiversity assessments in Serbia and Montenegro
- Assisting on biodiversity assessments in Bulgaria and Armenia

Knowledge Management

- Designing and maintaining databases to track environmental compliance actions and facilitate review by USAID Missions and Washington
- Preparation of the annual report to Congress of activities funded under the Paul Simon Water for the Poor Act
- Compilation of highlights of U.S. activities in Europe and Eurasia for the Fifth Ministerial Conference, "Environment for Change" in 2003

TECHNOLOGY TRANSFER, TRADE, AND INVESTMENT IN INFRASTRUCTURE

DevTech works with national and sub-national governments to achieve sound fiscal policies to support environmental trade, the transfer of appropriate technologies, and adaptation to climate change.

Trade and Technology Transfer

- Developing management systems for trade and investment programs
- Coordinating trade delegations in the United States and overseas, including Croatia and the Czech Republic
- Fostering public-private partnerships

Project Preparation and Finance

- Designing and delivering environmental finance trainings in the United States and Romania
- Developing tailored tools to assist clients to analyze the economic, environmental, technical, and financial aspects of environmental projects
- Analyzing market-based instruments, such as water and air pollution charges, designed to increase revenue for environmental investment
